Andrew:

In viewing the emails, they were talking about an SNC problem, the SEVs that we resolved were not in SNC. In viewing ECHO again the only SNC are two parameters that had effluent violations (SNC-Effluent Violations Monthly Average) that occurred in February 2015.

Please let me know if you want to resolve these violations? I have the dmr if you want to review.

Thanks! Shall I expect that ECHO will reflect the changes on Tuesday, which is earlier than their request? (SDWA databases aren't that fast)
If yes, sounds like we might not need a Tuesday meeting. Otherwise, we might need a letter or some correspondence to them explaining what is transpiring.

Have a good weekend!

As long as someone to explain to me why ECHO shows that they are in significant non-compliance, it can be a permitting meeting.

Pass it on to NPDES Permitting. Administrative extension of an existing permit are allowed. As long as WA submitted a permit renewal application, there is no enforcement issue.

Well, it looks to me like it is both... but I'm from SDWA

-Permit renewal being a permit issue, and

-Permit enforcement of the permitted/authorized discharges requested by WA and approved by EPA Region 3 under the "bypass" clause of the NPDES Permit #0000019.

Andrew,
Thanks for pointing that out. Based on the information provided, does this seem to you like it is primarily an NPDES enforcement or permitting issue? Or really do we have a chicken and egg situation.

I really didn't know who to reach to and went to permitting first, but would be glad to change the intent to enforcement if that is the primary focus.
Thanks!

Where: Conf Room TBD

See below request from Washington Aqueduct regarding NPDES enforcement and related permit status.

Wendy,

After Mary Letzkus retired, our NPDES renewal application has been dormant. That renewal application was timely and asked for a couple of minor adjustments. We have not pushed from our end on reissuing the permit because the de facto administrative extension of the permit that was expiring meets our needs.

So, I don't know to whom the reissuance has been assigned.

Tom Jacobus

Subject: ECHO Noncompliance

Hi Wendy:
Happy Holidays! Hope that you are enjoying the holiday season and in good spirit.

I tried to call you but could not get in touch with you. Washington Aqueduct (WA) needs your immediate assistance with respect to compliance status in the Enforcement and Compliance History Online (ECHO).

This database is showing noncompliance for WA for FY 2014 and FY 2015 and this is related to permitted/authorized discharges requested by WA and approved by EPA Region 3 under the "bypass" clause of the NPDES Permit #0000019.

WA is requesting correction so that this error in the of this database be corrected and noncompliance be removed. We became aware of this issue when we were gathering needed information to for the Environmental Awards with the Army. To be eligible for this award, the organization should not have significant noncompliance.

When the ECHO database was searched, it reported two noncompliance during the FY 2014 and FY 2015 (see 2 attachments). For this period, all of the discharges from WA have always been in compliance with the conditions stipulated by EPA Region 3 in approval of "bypass" requests.

Our eligibility is determined by what's reported in the EPA's Enforcement and Compliance History Online (ECHO). The specific eligibility criteria is below:

"Compliance History. Each installation in the U.S. or its territories shall submit the latest available Detailed Facility Report from the ECHO database (<https://www.echo.epa.gov>). Installations with High Priority Violations (HPV) or Significant Non-Compliance (SNC) during the 2014-2015 achievement period will be ineligible to compete in any category of the SecArmy and SecDef Environmental Awards, unless the installation can prove (with supporting documentation) that its inclusion in the ECHO report is erroneous. Prior to submitting nomination packages to OACSIM, ACOMs/Agencies shall screen nominees against the ECHO report, as well as their own internal reporting on environmental violations, at each of the installations nominated."

Therefore, WA is requesting EPA Region 3 a formal letter stating that "Washington Aqueduct does not have High Priority Violations (HPV) or Significant Non-Compliance (SNC) during the 2014-2015 period so that we can proceed with our request for Environmental Awards with the Army.

Your immediate help is requested in this regard as the deadline for this submission is 12/27/2015.

Thanking you in anticipation.

Regards,

Shabir A. Choudhary, P.E.
Section Chief
Washington Aqueduct
